Reply-To: iana-questions@iana.org

To: bluroofmusic@gmail.com

To whom it may concern:

This is an automatically generated message to notify you that we have received your request, and it has been recorded in our ticketing system with a reference number of 585306.

There is no need to reply to this message right now. IANA staff will review your message shortly.

If this message is in reply to a previously submitted ticket, it is possible that the previous ticket has been marked as closed. As we review this ticket, we will also review previous correspondence and take appropriate action.

To expedite processing, and ensure our staff can view the full history of this request, please make sure you include the follow exact text in the subject line of all future correspondence on this issue:

[IANA #585306]

You can also simply reply to this message, as this tag is already in the subject line.

Thank you,

The Internet Assigned Numbers Authority

Type of Assignment:  
Permanent registration error corrections in IPP Registry

Copy of revised IANA XML registry is at:  
<ftp://ftp.pwg.org/pub/pwg/ipp/IANA-IPP-registrations/>  
in the file ipp-registrations-for-iana-20120627.xml

Changes:  
- Global change: "Document Templates" to "Document Template"  
- Global: Fixed keywords to define values for main attribute, references for -foo

- Global: Fixed enums to define values for main attribute, references for -foo
- Global: Fixed sorting of many attributes.
- Global: xxx-default, xxx-ready, and xxx-supported attributes belong in the Printer Description collection since they are Printer attributes.
- Global: xxx-actual attributes belong in the Job/Document Description collections
- Global: Fix collections to define members for main attribute, references for -foo
- Added new definitions from PWG 5102.4 - PWG Raster
- Added missing operation extension registrations for PWG 5100.5, PWG 5100.11, and RFC 3380, and fixed the registrations of others to follow RFC 2911 requirements
- Added missing insert-after-page-number-supported rangeOfInteger(0:MAX), insert-count-supported (rangeOfInteger(0:MAX)), stitching-offset-supported 1setOf (Integer(0:MAX) | rangeOfInteger(0:MAX)), stitching-locations-supported 1setOf (Integer(0:MAX) | rangeOfInteger(0:MAX)) Printer Description attributes from 5100.3.
- overrides.pages appeared multiple times in document template
- There was no "&lt;Any other Template attribute affecting pages&gt;" for overrides in document template
- Added missing presentation-direction-number-up-default and -supported
- Added print-content-optimize/-actual to Document Template/Description collections
- Added media-grain, media-thickness, and media-tooth member attributes from PWG 5100.11 (accidentally deleted)
- Added missing cover-back-supported and cover-front-supported keyword values from PWG 5100.3
- Added missing document-message operation attribute from PWG 5100.5
- Added missing page-delivery-default/-supported keyword registrations from PWG 5100.3
- Added missing page-order-received-default/-supported keyword registrations from PWG 5100.3
- Added missing presentation-direction-number-up-default/-supported keyword registrations from PWG 5100.3
- Added missing print-content-optimize-default/-supported keyword registrations from PWG 5100.7
- Added missing separator-sheets-default/-supported keyword registrations from PWG 5100.3
- Added missing stitching-supported keyword registrations from PWG 5100.3
- Added missing stitching-reference-edge-default/-supported keyword registrations from PWG 5100.3
- Added missing x-image-position-default/-supported keyword registrations from PWG 5100.3
- Added missing y-image-position-default/-supported keyword registrations from PWG 5100.3
- Removed page-overrides-actual and pages-per-subset-actual since the dependent spec (5100.4) is obsoleted
- Removed operations-supported value 0 (not a valid enum)
- Fixed the registration of copies-supported (just rangeOfInteger(1:MAX), no 1setOf)
- Fixed the registration of job-error-sheet (missing media and media-col)
- Fixed the registration of job-finishings-col-ready (was "1setOf type2 enum" but should have been "1setOf collection")
- Fixed the registration of media-input-tray-check-default to also have the "no-value" out-of-band value
- Fixed the registration of pdl-init-file-\* (and all -supported attributes are Printer Description)
- Fixed the registration of save-xxx-supported attributes
