IPP Encrypted Jobs and Docs. v1.0

• Interim draft:

 https://ftp.pwg.org/pub/pwg/ipp/wd/wd-ipptrustnoone10-20190418rev.pdf

Summary:

- Goal is to provide end-to-end privacy and data integrity through intermediaries using existing public-key standards
- Defines new PGP-encrypted IPP message format, associated attributes, and operations

Proposed schedule:

Prototype draft Q1 2020

Job Accounting with IPP v1.0

- Interim draft:
 - https://ftp.pwg.org/pub/pwg/ipp/wd/wdippaccounting10-20191023.pdf
- Best Practice document defining how to support job accounting with existing IPP attributes and functionality
 - Like the Implementor's Guide but for standards-based job accounting
- Next slides:
 - Survey on the pwg-announce and IPP mailings lists
 - Informed consent and optional metadata
- Proposed schedule:
 - Prototype draft in Q1 2020

RFC: Job Accounting and Managed Printing Solutions

- Posted a request for comments to the pwg-announce and IPP mailing lists:
 - https://www.pwg.org/pipermail/pwg-announce/2019/003899.html
 - https://www.pwg.org/pipermail/ipp/2019/020275.html
- Received four responses so far
 - Consensus is that the current set of IPP operation and Job Template attributes can provide all of the metadata needed
 - One wants tighter security OAuth for authentication and stricter policies for TLS certificates, with self-signed certificates seen as a security issue
 - Two want a clearly defined workflow for accounting what attributes to use, what authentication to use, TLS requirements, etc.
 - One expressed a desire to treat an authenticated identity separate from an accounting identity
 - Metadata can be required, e.g. an account number for billing, or "nice to have", e.g. what applications are being used

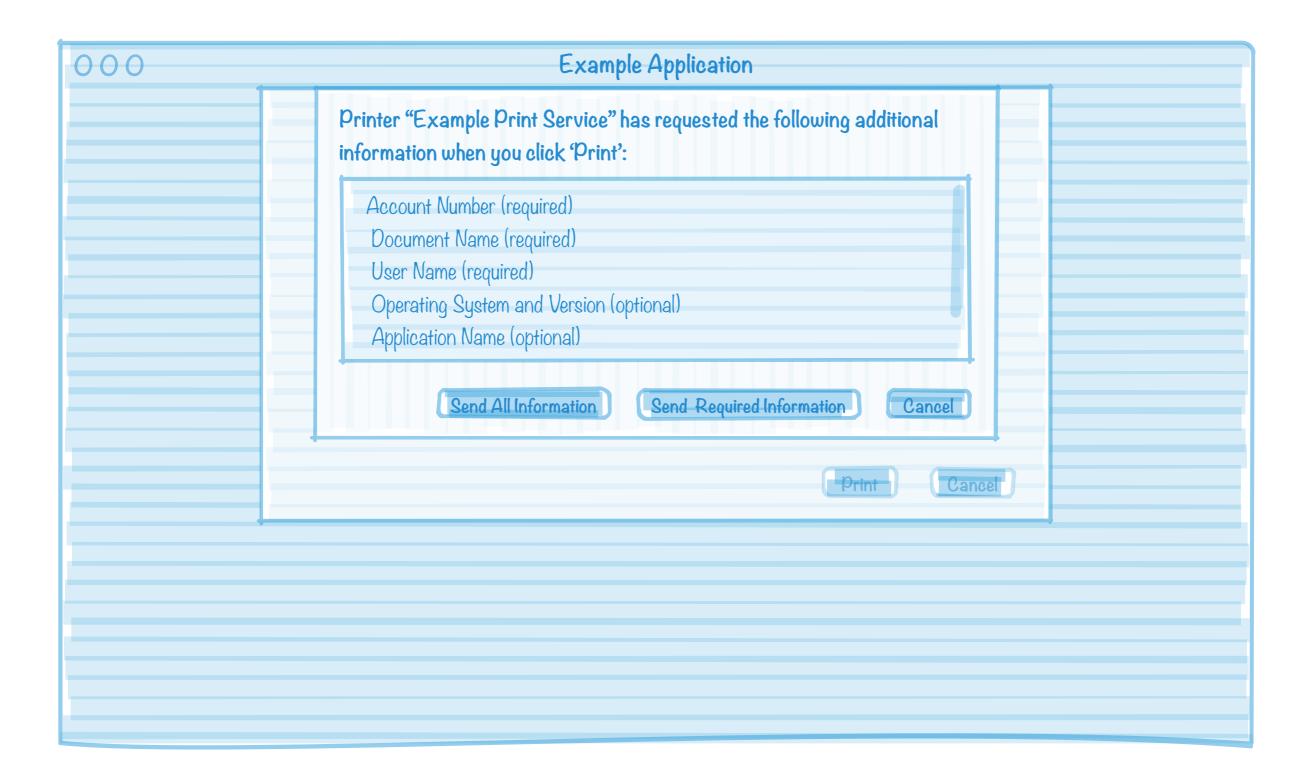

Informed Consent and Optional Metadata

- How to balance vendor and site needs/requirements with user privacy/regulatory (GDPR and others) compliance?
 - Vendor/site needs can vary significantly
 - Users need to know what information is being supplied and what is done with it, so that they can provide informed consent
- Printer (print service) can already list required attributes with "printer-mandatory-job-attributes (1setOf keyword)" Printer Description attribute
 - New "printer-requested-job-attributes (1setOf keyword)" Printer
 Description attribute to list attributes that the Printer would like to
 see but are not required for Job submission
 - Currently defined in the Job Accounting with IPP document, but could be moved to the IPP Driverless Printing Extensions (update of JPS3)
- Client can query these attributes prior to Job submission and display a consent dialog for the user

Informed Consent and Optional Metadata (con't)
