

# PWG Plenary Status Report MFD Working Group

December, 2009  
Austin, TX PWG F2F Meeting

# Purpose of the effort

---

**The MFD working group is concerned with the modeling of imaging services and subunits that comprise a network connected Multifunction Device. The Objectives are:**

- Drive to a standard semantic definition for an MFD's Subunits, Services, Jobs and Documents.
  - Agreement on the semantics of their attributes, operations and parameters.
- Currently being addressed are an overall MFD specification, Copy Service and FaxOut Service.
  - The Print, Scan and Resource Services have been completed
- The definition of a framework for the complete model is an objective.

# Approved Documents:

# Schema Status:

---

- Initial version of Power Management data has been added under SystemDescription
- No overall MFD Service exists at this time to allow modification or query of Power Management data. (i.e., the only defined method is via SNMP Get/Set)

# Remaining Services

---

- Services planned to be addressed after the current Services are complete. (Subject to change based on group consensus)
  - FaxIn Service
  - EmailIn Service
  - EmailOut Service
  - Transform Service
  - MFD Service

# Next Steps

---

- Work to complete the MFD specification.
  - Delay PWG wide Last Call and Formal Vote until at least one service normatively dependant on this specification reaches Last Call status
- Complete Copy Service specification and find resource to prototype
- Resume FaxOut work using normative dependencies on MFD specification
- We need people to step up as editors of remaining service specifications. The MFD specification reduces the amount of work to produce a service specification. The current Copy specification and next version of the FaxOut specification can be used as templates.

# More Info/How to participate

---

- **We welcome more participation from member companies**
- **The group maintains a Web Page for MFD That includes links to the latest documents, schema and a browsable version of the schema**
