

PWG WIMS CIM Alignment

Conference Call Minutes

June 2, 2008

Meeting was called to order at approximately 11 am EST, June 2, 2008.

Attendees

Ira McDonald	High North
Rick Landau	Dell
Craig Whittle	Sharp
Nancy Chen	Okidata
Pete Zehler	Xerox

General Discussion

- ❖ Minutes from the previous teleconference were accepted (see ftp://www.pwg.org/pub/pwg/wims/minutes/cim-wims_080512.pdf) were approved.
- ❖ Rick posted a new version of the imaging counters Visio diagrams on the wiki pages (see ftp://ftp.pwg.org/pub/pwg/wims/cim/Visio-Counters_03.pdf.) The diagrams were reviewed with the following with the teleconference participants.
 - Imaging statistical data support three types of persistence depending on particular implementation (see page 3).
 - **Lifetime**
 - **Power on** counter disappears until needed
 - **Reset** are instantiated once but can reset to zero
 - Other changes to the diagrams were discussed and have since been posted in v3.
- ❖ Rick to take diagrams to “core” for review
- ❖ Should we add print service counters?
 - For now document will refer to manage element, imaging statistical data

- ❖ Follow up on action items:
 - Ira to work on imaging statistical data.
 - Base class is done. Instance or concrete class work still needs to be done in conjunction with the parent
 - Imaging Statistical class
 - Image monitory statistical data (child)
 - Rick updated group on Prototyping effort.
 - First 30 lines of pseudo code written.
 - Discussion of Nancy Chen's suggestion to make MIB to CIM converter code generally available, and what would be involved to support this.
 - PWG typically does not supply code to the world
 - This should be discussed with the general membership.
 - Should the PWG contract this work?
 - Should Linux Open Printing Foundation can take this on?

Next Steps / Open Actions:

- Next teleconference scheduled for June 16, 2008
